EXPERIENCE

Pantheon Data - Team Lead

Aug 2024 – May 2025
Led end-to-end solutioning from design to implementation on a Salesforce Government Cloud project partnering with Salesforce. Orchestrated micro solutioning of user stories into precise Salesforce deliverables. Architected and developed advanced Salesforce solutions by translating complex business requirements into scalable systems, specializing in data modeling, integration, and security frameworks to ensure efficient and secure CRM platforms tailored for government use. Set up Public Sector TRM-based Salesforce Industries solutions for a government client (Department Of Defense) that utilized OmniStudio assets—OmniScripts, DataRaptors, and Integration Procedures—to streamline data flows and enhance user journeys

Nuvitek - Sr Associate Salesforce Consultant

Oct 2023 – May 2024

Co-led end-to-end solutioning, from design to implementation, for Salesforce Government Cloud projects ensuring adherence to best practices in Sales Cloud and Service Cloud. Provided expert guidance on best practices, code standards, and performance optimization, while conducting meticulous code reviews and recommending cutting-edge Salesforce tools and methodologies to drive innovation and efficiency in government operations.

Warner Music Group - Salesforce Developer/ Analyst

Feb 2023 – Nov 2023

Streamlined data remediation in the org to migrate 38 workflows and 12 complex process builders to consolidated flows in Sales Cloud and Service Cloud. Designed and implemented a Quarter Revenue Calculator to streamline revenue tracking, showcasing analytical skills relevant to high-volume systems like Ad Platforms. Translated business requirements to engineer versatile Lightning Web Components (LWC) focused on bulk contract approval/rejection and bulk upload Excel files to create records from Excel sheets. Managed the full lifecycle of projects, ensuring successful delivery and adherence to project timelines and goals.

Amherst Group - Salesforce Developer

July 2022 – Dec 2022

Constructed multiple flows (loginFlow, scheduled, record triggered) to automate processes supporting internal employees and portal users in Sales Cloud, Service Cloud and Marketing Cloud. Authored Apex service classes, LWCs, and Visualforce pages to integrate with DocuSign, Bitly, and Cloudfront. Facilitated mass record updates using Excel functions and Workbench. Collaborated on resolving merge conflicts using Git tools and GitHub. Enhanced mobile-friendly digital experiences by leveraging front-end expertise in CSS for a seamless, responsive interface.

Smoothstack / Accenture Federal Services - Associate Software Engineer

Dec 2020 – March 2022

Developed and delivered Salesforce Government Cloud products (Department of Justice), leading development from the ground up. Demonstrated success in platform automation, workflows, and abstraction APIs, contributing to the development of innovative software solutions. Developed API integrations for processing high volumes of JSON data and automating workflows, demonstrating expertise in handling large-scale integrations.
